• **New Membership/New Subscribers:**
Oregon-Nashua Township

• **Project Status:**

1) Disaster Mitigation Plan

Ogle County has been developing a disaster mitigation plan for about a year. We have provided tornado touchdown and path locations as well as critical facilities, flood plains, buildings in the flood plains, and critical infrastructure. Some of the final recommendations were to enhance GIS with hardware and software upgrades.

- 2) Sign Program
The sign program has been completed. Maps for the various entities have been produced and delivered.
- 3) Andy Shaw, our GIS Intern from NIU, has completed his internship. This internship was for a class therefore was it was a non-salary position. Andy completed the realignment of the streams in Ogle County.
- 4) GIS Website
The GIS website has been refreshed. We felt that a clean / streamlined look was needed.

- **New Business**

- 1) Fire Chief's Association Letter
In the past, we worked with the various Fire Districts / Departments thru the Ogle County Fire Chief's Association. Due to the varying needs of each Fire District it was determined that an individual approach was the best way to fill those needs.
- 2) ArcGIS Web Server
We are developing a new website for our GIS Partnership members. This site will allow our member to view / access / modify their GIS information. This will enhance our ability to offer immediate update mapping to our partnership.
